Replacing the covers

- Remove the white cover completely.
- Unscrew the blue grip on the trolley.
- Remove the power cable.
- If the ultrasound option is available:
 - remove the grey hose (3/Fig. 2)
- Loosen the covers (1/Fig. 1); two screws are also located on the other side.
- Remove the covers by lifting them up (no component of the suspension arm needs to be removed).
- Reverse the order of these steps to attach the new covers.
- Check off the corresponding line voltage on the line voltage label (1/Fig. 2) by referring to the old label and affix to the covers.

- Copy the information on the old label (model number and revision status) to the new revision status label (2/Fig. 2) and affix to the new covers.
- If the ultrasound option is not available:
 - Remove the steel cover (1/Fig. 3) from the old covers and attach it to the new covers.
- Check the protective conductor.
